Latar belakang: Fakta yang di temui di SD GMIT 07 OEBUFU adalah siswa/i belum memahami teknik dsar servis *backhand* Mempertimbangkan tingkat kemampuan siswa dalam menerima materi pembelajaran bulu tangkis, perlu adanya media pembelajaran khususnya dalam pembelajaran permainan bulutangkis yang dapat membuat peserta didik lebih tertarik mengikuti pembelajaran dan tidak merasa bosan pada saat kegiatan belajar mengajar berlangsung. Media pembelajaran tersebut berupa model-model pengembangan pembelajaran teknik permainan bulutangkis tentunya yang disesuaikan dengan peserta didik dan lingkungan sekolah.

Tujuan penelitian: Berkaitan dengan permasalahan tersebut, penelitian ini bertujuan untuk mengetahui tentang proses pembelajaran teknik dasa servis *Bakhand* dalam permainan bulu tangkis.

Metode penelitian: Penelitian ini adalah penelitian kualitatif yang menggunakan metode penelitian deskriptif kualitatif

Hasil dan pembahasan: Presentase proses pembelajaran teknik dasar servis *backhand* yang ditunjukan siswa rata-rata baik sekali. Hal tersebut menunjukkan bahwa nilai proses pembelajaran yang dicapai yaitu 82,5%. Berdasarkan hasil penelitian yang telah dilakukan berkaitan dengan proses pembelajaran teknik dasar servis *backhand* dalam permainan bulu tangkis maka secara umum proses tersebut berada dalam katagori memuaskan, dimana berdasarkan proses pembelajaran servis *backhand* keterampilan yang ditunjukan siswa rata-rata baik sekali.Hasil yang ditunjukan tersebut didukung oleh catatan lapangan berdasarkan eksperimen yang telah peneliti lakukan dengan pengukuran proses pelaksanaan servis *backhand* dengan predikat penilaian melalui 5 katagori nilai siswa menunjukan penampilan gerak yang sangat baik pada proses servis *backhand*.

Simpulan: Hasil penelitian tersebut diatas dapat disimpulkan kemampuan teknik dasar servis *backhand* siswa kelas IV[C] dapat dikategorikan sangat baik. Hal ini dilihat dari pelaksnaan yang dilakukan peneliti bahwa siswa saat mengikuti proses pembelajaran dengan menonton video tutorial teknik dasar servis *bachhand* dapat dilakukan dengan sangat baik.

Katakunci: *Proses pembelajaran; Bulu tangkis*

ABSTRACT

LEARNING PROCESS OF BACKHAND SERVICE BASIC TECHNIQUES IN LEARNING BADMINTON AT SD GMIT 07 OEBUFU

Background: The fact that was found at SD GMIT 07 OEBUFU is that students do not understand the basic technique of serving backhand. Considering the level of students' ability to receive badminton learning material, it is necessary to have learning media, especially in learning badminton games which can make students more interested in participating in learning and not feel bored when teaching and learning activities take place. The learning media is in the form of development models for learning badminton game techniques, of course, which are adapted to students and the school environment.

Research objective: In connection with these problems, this study aims to find out about the process of learning Bakhand's basic service techniques in badminton games.

Research method: this research is a qualitative research using descriptive qualitative research methods

Result and discussion: the percentage of the learning process for the basic technique of serving the backhand shown by the students was very good on average. This shows that the value of the learning process achieved is 82.5%. Based on the results of the research that has been carried out regarding the process of learning the basic techniques of backhand serving in badminton games, in general the process is in the satisfactory category, which is based on the learning process of backhand serving skills shown by students on average very well. The results shown are supported by Field notes based on experiments that have been carried out by researchers by measuring the process of implementing the backhand service with the rating predicate through 5 categories of student scores show very good motion performances in the backhand service process.

Conclusion: The results of the above study can be concluded that the basic technical skills of the backhand service of class IVC students can be categorized as very good. It can be seen from the implementation carried out by researchers that when students participate in the learning process by watching video tutorials on the basic techniques of serving bachhand, they can do very well.
