

CHAPTER V

CONCLUSION AND SUGGESTION

After analyzing the data in chapter four to answer the research problem, the writer would like to give some suggestions which are based on the conclusions that are gained from the findings and discussion. The conclusion and the suggestions in detail are presented below:

5.1. Conclusion

Based on the results of research that has been done by researchers and analysis of what the authors have described, it can be concluded as follows:

By following the information described in the previous chapters, the writer can explain that this research is the result of an analysis of various data that the author collected in research at SMP N 1 Kahaungu Eti. The writer can draw several conclusions regarding teaching speaking using YouTube videos which have been proven by the fact that the average pre-test (85%) is higher than the post-test (98%). Another important thing to note is that SMPN 1 Kahaungu Eti students are interested in learning to speak using YouTube videos. They agreed that learning to speak using YouTube videos could motivate them to learn to speak well and easily. The last important point is that some students find obstacles in learning to speak using YouTube such as a lack of understanding of vocabulary.

5.2. Suggestion

Based on the results of the study, the researcher has several suggestions for writers, readers and further researchers

1. For writers

This research has given the author more knowledge about observations about the use You-Tube videos through teaching English to improve speaking skill

2. For Readers

This research is able to provide information and methods about using YouTube videos through teaching English to improve speaking skill

3. further research

For further researchers, this research is expected to be a reference for conducting more in-depth research on the use of You-Tube videos through English Language Teaching to improves speaking skill.
