

CHAPTER V

CONCLUSIONS AND SUGGESTION

In this chapter the writer discusses about the conclusion and suggestion of the research finding.

1.1 Conclusions

Online learning has become an incredibly popular way for students and to advance their education development. Teaching online different methods from the traditional classroom, so it's important that teachers adapt or develop their skills to the online learning environment, to make their materials effective and engaging for learners

Online learning can certainly help Lecturers' and students' in getting information, because the information is presented in real time and can be accessed anytime and anywhere. Anywhere as long as there is sufficient and good internet network it can be possible. In the application of online learning makes it easier for students' to access and obtain subject matter provided by lecturers'.

Online learning also makes it easier for lecturers' to distribute assignments and learning materials and also makes it easier for students' to collect and do assignments and even allow for online exams

The implementation of online learning at English Education Study Program of AWCU has been carried out quite well. In the implementation of online learning, Lecturers' often use Whatsapp to communicate with students,

besides that, lecturers' are used Whatsapp to share information related to the learning. Meanwhile, in the implementation of online learning, the lecturers use Zoom to deliver learning materials to students'.

In delivering the material there are seven strategies that used by the lecturers, namely: Choosing the easy reading material, Reading Individual and Silent, Provide a lot of Reading Material, Students are free to choose what they want to read, Teacher Adaptations and Guide Students, Lecturers' as a Role Model and Choosing Online Media as Strategy in Teaching Extensive Reading.

Then, lecturers' perspective about students' responses, there are some facts about lecturers perspective first is students' difficulties with online learning, second is limited and messy discussion during online learning, the next is about students' pile of assignment, then students are complaining about bad internet connection, the last is they hardly to understand the material and error application.

5.2. Suggestions

Based on the results of the research that has been done, there are several suggestions as follows:

1. For Artha Wacana Christian University should facilitate teachers more in implementing learning, especially in the implementation of online learning as it is today. there needs to be debriefing or training for competent lecturers in this field so that in the future they can apply their knowledge to students in the field of technology and electronic information. Considering the current conditions IT-based learning is very important and in accordance with the times.

2. This e-Learning application that has been made can be applied and can be further developed in the future. With the development of e-learning, it can facilitate all learning activities in the campus environment.

I hope that all students and lecturers can enjoy online learning without experiencing any problems.

3. Online learning can still be developed again with the features that presents information in the form of multimedia, so that edutainment material can be produced, this is where the role and task of the university as a place to create and make new breakthroughs in the field of online learning, so that in the future students and lecturers will no longer have difficulties in conducting online learning activities.

4. For the Lecturer' can be further develop learning that can create learning conditions even though it is done in a network or online learning, communicating more often with students. Teacher more improves their creativity as a lecturer to become a more professional teacher.

5. For the Students' are given more motivation in learning so that during the implementation of online learning students still have high spirits and can follow the learning process well in accordance with the learning objectives to be achieved in class. then more swiftly in preparing themselves to take part in online learning

6. For further researchers, suggestions that can be given related to this research are expected to further researchers to add to conducting observations in class before conducting interviews and providing research questionnaires.

7. For further research, it is also expected to use more sources to find and review the latest strategies used by lecturers in teaching extensive reading during this covid-19 pandemic.
