**Background:** Futsal is a major ball sport played by two teams, with 5 players per team. The level of student interest in playing futsal ball can be influenced by several factors such as the availability of facilities and infrastructure as well as the motivation provided by teachers and parents.

**Research aim:** The aim of this research is: to increase the interest of female students in participating in futsal extracurricular activities at SMA Negeri 5 Kupang. This research is classified as a quantitative descriptive research type using a survey approach

**Results and discussion:** Results and discussion: Based on the research results, a survey of students' interest in participating in futsal extracurricular activities at SMA Negeri 5 Kupang was obtained into the "Very High" category with 16 students = 49%, the "High" category with 12 students = 36%, the "High" category with 12 students = 36%, the "High" category with 12 students = 36% Insufficient "4 = 12% and in the Very Poor category 1 student = 3%. So the total percentage categorization results are 100%

**Conclusion:** For students, interest in participating in futsal extracurricular activities is very important because it can move students' behavior in a positive direction so that they are able to face all demands, difficulties and bear risks in their studies. Interest can determine whether or not you are good at achieving goals, so the greater the interest, the greater the success in learning
