Background: Physical education, sports and health is a development process. Sports is one part of national development which requires people with behavioral characteristics that support the development of an easy generation.

Research Objective: To find out the coaches of pencak silat athletes (PSHT). In learning C kick exercises, Pencak Silat athletes (PSHT).

Research method: Using descriptive qualitative data collection by means of observation, interviews and documentation. The research subjects were 25 people and pencak silat trainers.

Results and Discussion: The results of the research show that the learning process of the Kick Training Survey (C) for Pencak Silat Athletes from the Setia Hati Terate Brotherhood (PSHT) Central Malacca Branch, Malacca Regency involves several stages, namely: (1) Preparation stage, including warm-up and explanation of the material; (2) Implementation stage, including C Kick training with the guidance of a Pencak Silat Athlete Trainer; and (3) Closing stage, including evaluation and cooling. Pencak Silat Athlete Trainers use various learning methods, such as demonstrations and providing feedback. Athletes show high enthusiasm and motivation in participating in learning. However, there are still several obstacles in the learning process, such as athletes being afraid to carry out the C Kick Exercise movement technique.

Conclusion: Based on the description above, it can be concluded that the process of learning Kick C. has been structured according to stage by stage.

Keywords: C kick training.
