

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter will discuss about conclusion and suggestion of the research finding.

#### 5.1 Conclusion

Based on the researchers findings and discussion result of the research. It is concluded that the teacher's readiness at SMA Advent Nusra is good and ready to implement internet-based teaching. The teacher's ready to prepared internet facilities (smartphone and internet quotas), prepare lesson plan, prepare electronic media such as (video quiz tutorials) and electronic tools (hand phone and laptop, ommunicate to parents that learning will be done remotely, prepare some applications used by teachers in online learning like zoom, WhatsApp, Youtube and google classroom.

Teacher competence which includes skills and knowledge she felt that she still really need knowledge and skills about the use of internet media because it is very important in this static and dynamic era in learning. Must always be ready in all situations. This the right time to update knowledge and skills about using media internet. The point is that when using media in learning of course should not be lazy and always be creative in presenting the material because if it is only written material, the students are bored. That was way the teacher sometimes sent videos and voice note and various techniques so they did not get bored.

In addition the availability of facilities and infrastructure in implementing internet-based teaching by teacher and can make it ease of internet access in SMA advent Nusra are well available internet quota, teaching materials were not monotonous or varied and elotronic tools like smartphone and laptop will support learning process activities and improve teacher performance in implementing internet-based teaching.

## **5.2 Suggestion**

In this research, the writer would like to suggest some important things as follows:

1. For the teacher, even though the teacher's knowledge about internet has increased, it is expected to be more proficient in technology. However, in implement internet-based teaching conditions, teacher quality is very needed in the use of technology.
2. For school is expected to prepare the teacher in training, guiding, directing the use of the internet.

For other researcher and teachers, this finding could be useful as a reference relating to the study about teacher's readiness in implementing internet-based teaching.
