Background: Based on the results of the researcher's observations while teaching in class IV at SD GMIT 07 Oebufu, several problems were found in learning. These problems are as follows (a) students need motivation in learning physical education with soccer material, (b) the learning methods applied by teachers must be more effective so that students are more active in receiving lessons, (c) students do not really understand the basic techniques of passing in football.

Research objectives: The aim of this research is to determine the learning of basic football passing techniques in class IV students at GMIT 07 Oebufu Elementary School.

Research methods: This research method uses a qualitative descriptive method which is used as a method or procedure for collecting data by means of observation, *interviews* and documentation

Results and discussions: Based on the results of research on passing techniques in football as stated by the teacher that students can perform football passing techniques well, teachers also carry out learning stages, namely introductory, core and closing activities and modify facilities so that students are easier to perform football passing techniques.

Conclusion : Passing technique activities in football learning at GMIT 07 Oebufu Elementary School, students are very enthusiastic in following it.

Keywords: Passing Technique, Football Learning.
