

## **CHAPTER V**

### **CONCLUSION AND SUGESSTIONS**

#### **5.1 CONCLUSION**

Based on the research data, the researcher concluded that the MBKM course internship program can increase knowledge about the internship program for fifth semester students of the English Language Education Study Program. This can be seen from the results of the study obtained with the following data: as many as (39.09%) have knowledge about the internship program with a very high category Strongly Agree, as many as (50%) have knowledge about the internship program with a high category Agree, as many as (5,15%) have knowledge about the internship program with a low category Undecided students (4.48%) have knowledge about the internship program with a very low category and (0.90) Strongly Disagree. Based on the information above, it can be concluded that in general the internship program for students of the English Language Education Study Program has a percentage of Very High (Strongly Agree) and High (Agree) which are not much different but most are in the High category (Agree).

#### **5.2 SUGESSTIONS**

Based on the conclusions above, the researcher provides the following suggestions:

1. The results of this study have an impact on students of the English

Language Education Study Program to always try to improve their internship program. One way is to follow the MBKM course program. The results of this study indicate that there are still some students of the English Language Education Study Program who do not have knowledge about good internship programs that will later be used to compete in the world of work.

2. This research also has an impact on the Faculty of Teacher Training and Education, especially the English Language Education Study Program as an educational institution that graduates bachelors of English Language Education, namely to improve the insight of its students in the internship program through lectures and other activities outside of lectures. The goal is to obtain sufficient provisions for an educator.
3. For other researchers, the results of this study can be additional information and knowledge for those interested in conducting research related to the MBKM Course Program that can improve student internship programs. The results of this study can be important reference materials, which provide insight into the effectiveness and impact of implementing the MBKM Course Program in the world of education, especially after the research period. Researchers can use the results of this study to deepen their understanding of how the MBKM Course Program can find out about student internship programs. This knowledge can help in the development of further research.
